

AMBIT®

“The subtlety of what remains unseen”

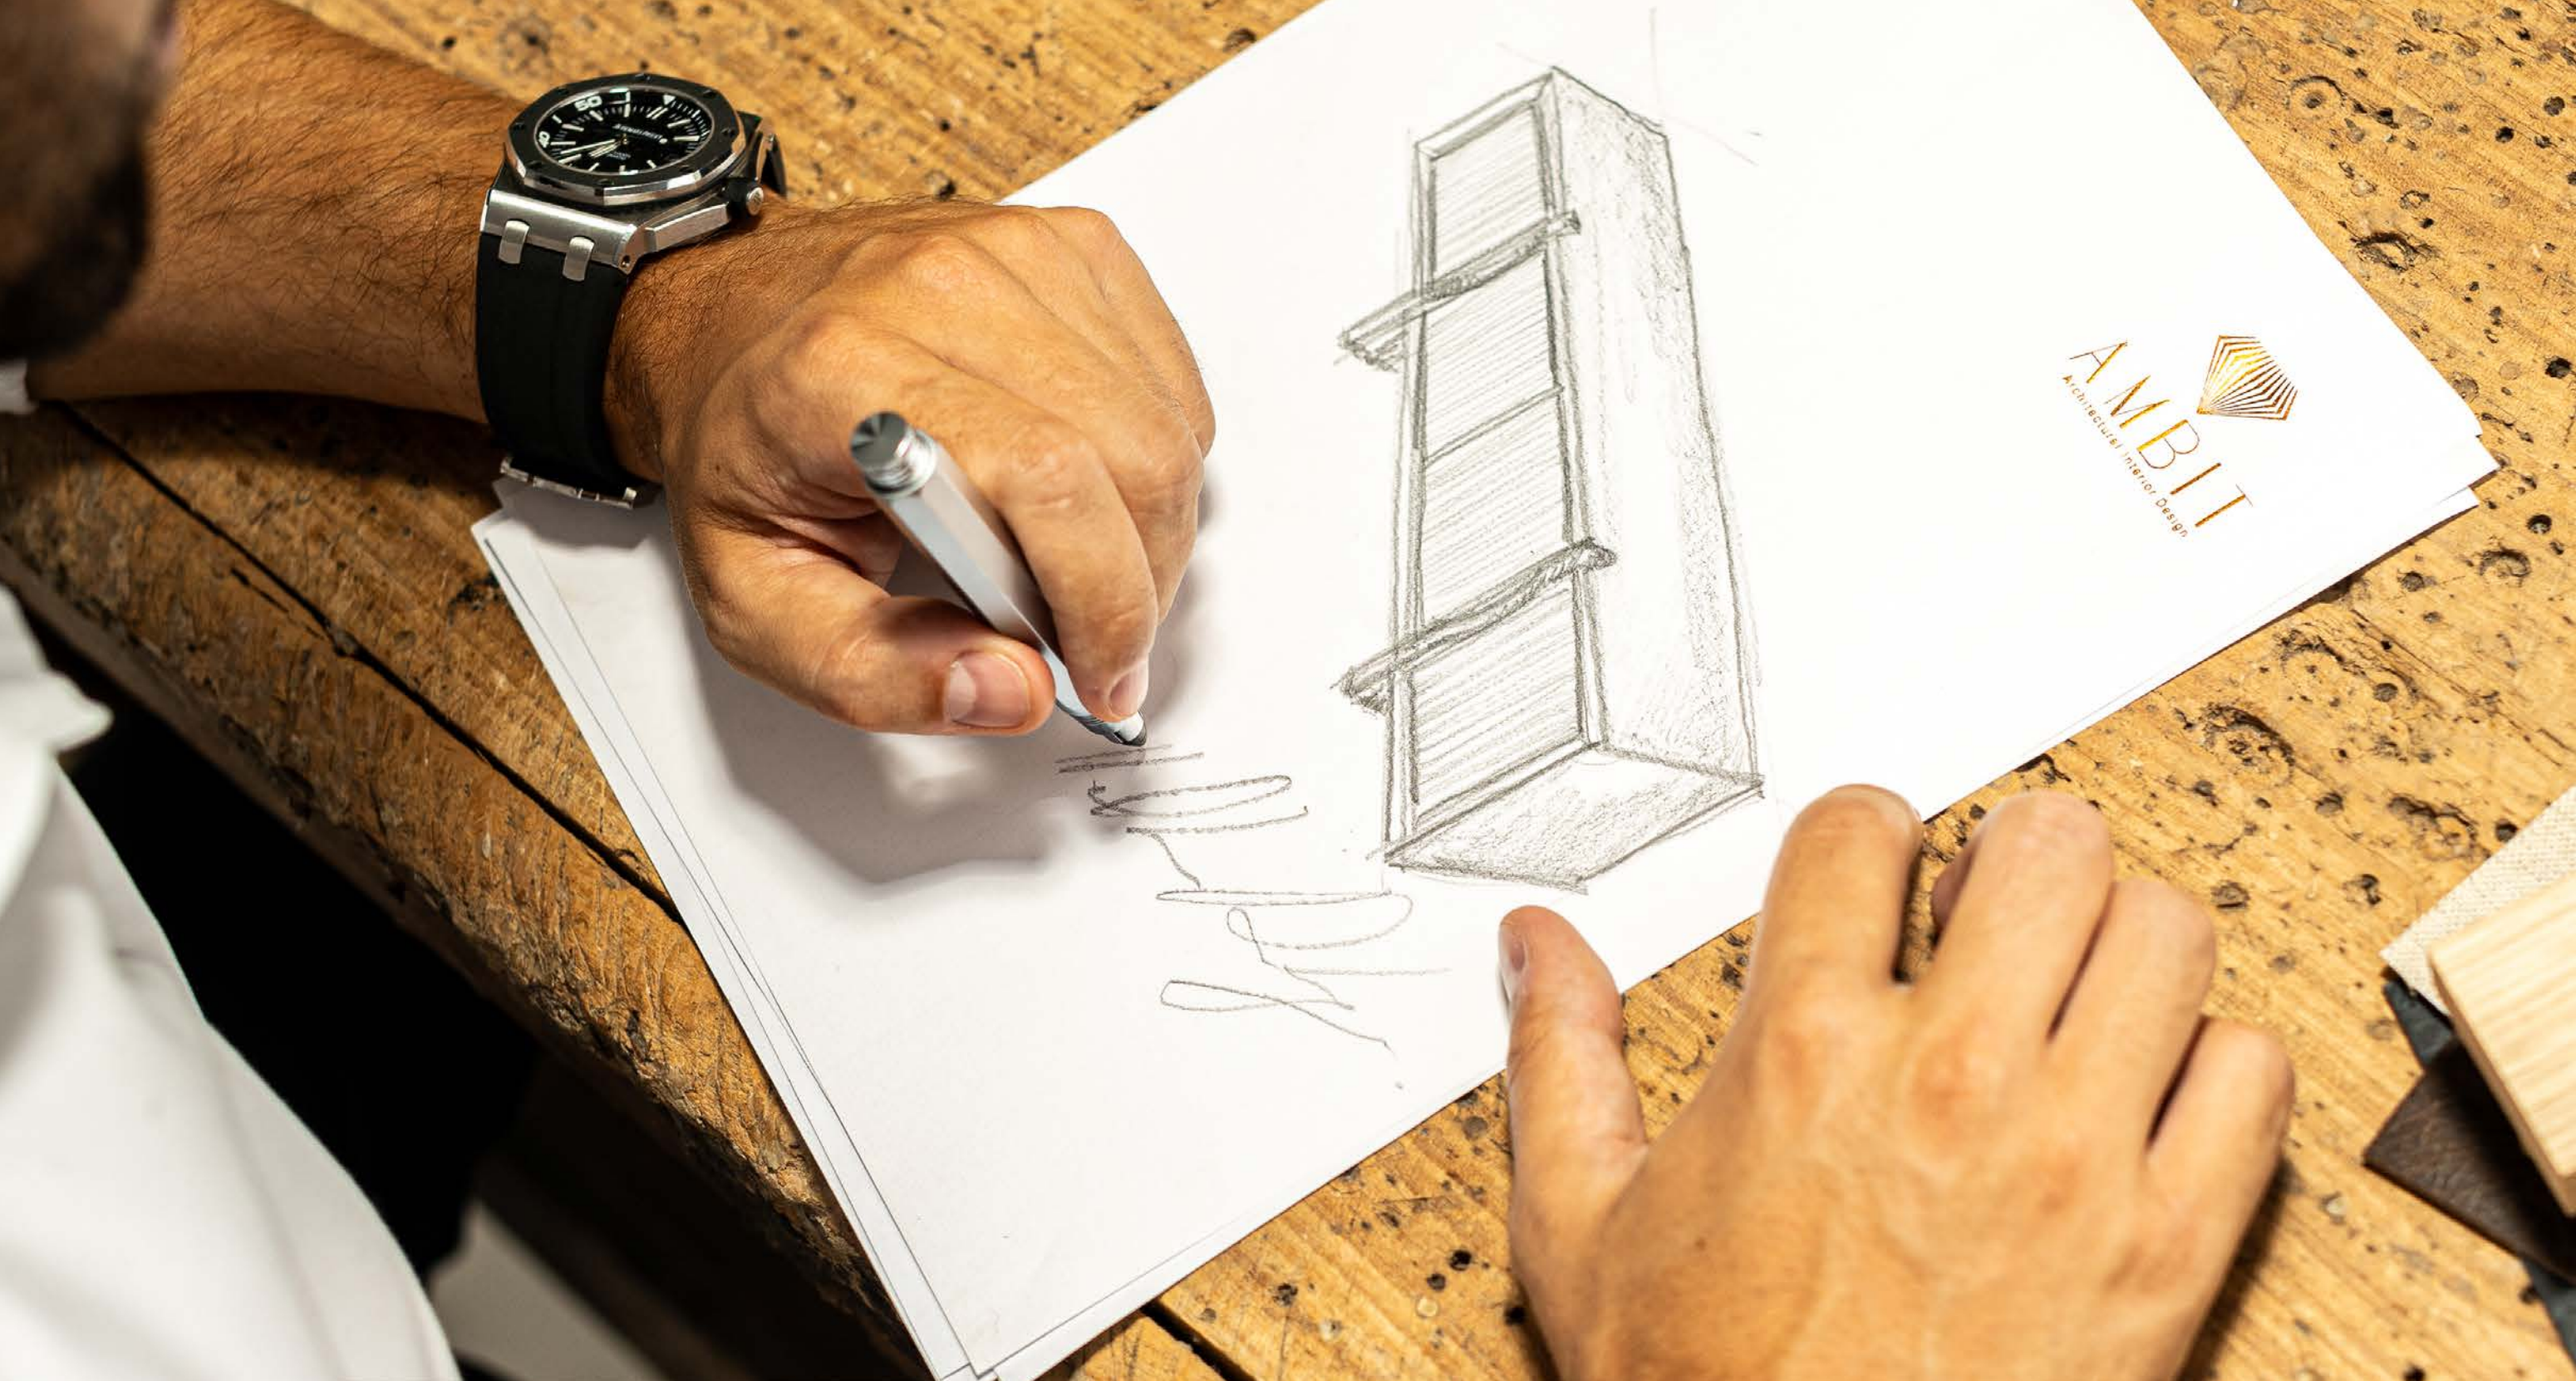

LAKE COMO IDYLL

Helder Rodrigues developed a clear vision from an early age, to humanize spaces through pieces that transcend their mere decorative function. It is from this relentless pursuit of creating environments endowed with identity, personality, and meaning that AMBIT is born.

Each creation is rigorously thought out and designed, driven by an obsessive attention to detail, uncompromising standards of quality, and absolute timelessness.

AMBIT
Architectural Interior Design

For over half a century, we have crafted a legacy defined by excellence, without ever compromising our identity.

We merge the precision of the most demanding artisanal techniques with the innovation of modern technology, creating timeless pieces that embody artistry, elegance, and distinction.

NAERVAER

Elegance, subtlety, and harmony are the feelings that welcome us upon arrival. However, it is in discovering our pieces that their true personality is unveiled: much like in a relationship, time takes care of revealing their essence.

It is for this reason that, with every door or drawer that opens, an unexpected explosion of emotion, surprise, and discovery unfolds. This captivating duality defines the signature and true essence of AMBIT design.

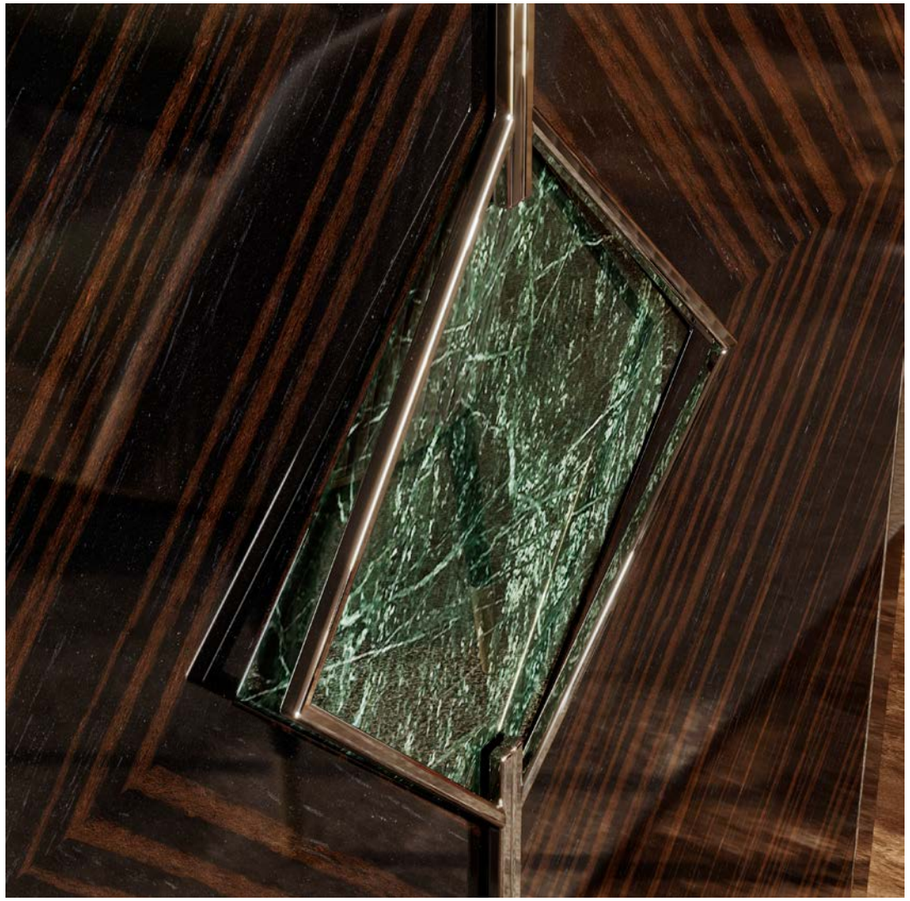

AMBIT pieces are not merely conceived, they are created to be lived with, to store memories, and to accompany generations.

These are elements that gain value over time, become part of a family's history, and are passed down from generation to generation, establishing themselves as true heirlooms. This is the essence of AMBIT: create today what will continue to have meaning tomorrow.

AMBIT creates more than furniture, it crafts experiences.
Each solution we design is a fusion of beauty, precision, and discretion,
tailored for those who accept nothing less than perfection.

Our work carries a signature that is unmistakably ours - global in vision,
sophisticated in execution, and personal in every detail.
Step by step, with intention and consistency, we move toward new horizons.

"For us, this is not just a story, it is our legacy"
